

The **Sixth European Conference on Crystal Growth (ECCG6)** is organized by the **European Network of Crystal Growth** and the **Institute of Physical Chemistry, Bulgarian Academy of Sciences**. The conference will be held in September **16-20, 2018** in **Riviera Holiday Club, Varna, Bulgaria**. As a satellite event the **Second European School on Crystal Growth** for young researchers and PhD students (**ESCG2**) will take place in September 13-16, 2018 at the same place.

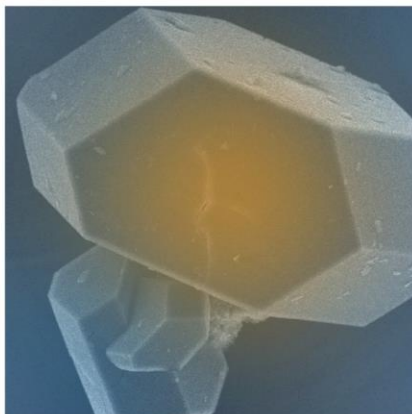

Both ECCG6 and ESCG2 are dedicated to the famous Bulgarian scholar **Iwan N. Stranski**. Professor Stranski (1897-1979) played a crucial role in the last century in setting up the theoretical fundamentals of nucleation and crystal growth phenomena.

The aim of ECCG6 is to excite discussions and stimulate fundamental and applied research in the field of crystal growth and to inspire multidisciplinary approach to scientific problems closely related to the demands of the human society in different fields of the modern life.

Welcome to ECCG6!
